

To: North Miami High School occupants:

On 6/05/2023 North Miami High School completed a routine drinking water test for Lead and Copper. Indiana department of Environmental Management (IDEM) requires public notification of these results. All 10 sampling points came back well under the action level requirements of 15 ppb for Lead and 1.3 ppm for Copper. The following pages are the results from this testing.

Bruce Murphy
Certified Drinking Water Operator
